- Annual volume: 20,000+ carloads

CLOSE TO YOUR MARKETS

Louisville & Indiana Railroad (LIRC) prides itself on expediting railcars for shipping, distribution, and manufacturing facilities in a safe manner with rapid turn times. To better serve our customers and their markets, LIRC has made significant investments in the Southwind Project—opening the entire rail-road to 286,000 pound gross weight railcars and higher train speeds. On average, transit time is typically two days or less throughout our entire system.

Directly serving locations between Indianapolis and Louisville for a quarter century, we've helped diverse businesses locate in a variety of facilities on our 106 miles of track. We provide daily, direct rail interchanges with CSX, Norfolk Southern, The Indiana Rail Road, and Paducah & Louisville Railway. Our rail-served sites offer convenient access to major interstate highways, as well as the Port of Indiana–Jeffersonville that provides year-round water service to the Gulf of Mexico via the Ohio and Mississippi rivers.

A strong labor market and friendly business climate support the profitability and growth of businesses both in Indiana and Kentucky.

Please contact us for additional information.
