NLR

NORTHERN LINES RAILWAY

SERVING MINNESOTA'S HEARTLAND

Northern Lines Railway (NLR) connects Minnesota's lumber, granite, cement, agricultural, building product, and manufacturing businesses with North America via efficient, environmentally friendly freight rail service. We operate and maintain 25 miles of BNSF-owned track from St. Cloud, Minnesota, interchanging 10,000 annual carloads with BNSF for points throughout North America.

Convenient access to I-94 facilitates efficient, quick transloading for multi-modal movements within the region.

Our commitment to excellent operations supports your customer service requirements. Our local management team provides personal attention to your shipment, and supply chain visibility via electronic bills of lading and railcar track and trace.

Centrally located in Minnesota, there is room here for industrial developments suited to manufacturing and distribution. Contact us to find out how your upper Midwest business operations can grow using reliable freight rail service.
